Registrant's telephone number, including area code: 918/573-2000

Not Applicable

(Former name or former address, if changed since last report)

2

The Williams Companies, Inc. (the "Company") has reported unaudited net income of \$32.1 million, or 7 cents per share on a diluted basis, for the third quarter that ended September 30, 1998.

In addition, the Company reports that in 1988 certain royalty owners in a producing field in Cameron Parish, Louisiana, brought suit against a subsidiary of the Company and other working interest owners seeking additional royalties or lease cancellation. An amended Petition later added a second subsidiary of the Company, the Company, and additional working interest owners. All other defendants have been dismissed or have settled with Plaintiffs. In their recently amended damages claim, the $\ensuremath{\mathsf{Plaintiffs}}$ asserted royalty underpayments plus interest of approximately \$12 million. The claimed damages are attributable to all working interests for a period of approximately 15 years. One of the two subsidiaries of the Company party to the litigation owned a one-half interest in the field and served as operator for approximately eight years. The other subsidiary purchased produced gas from the field. Plaintiffs also request punitive damages equal to double the alleged actual damages and attorneys' fees. The Company believes all royalties due from its subsidiaries were properly paid, that the field was properly operated, and that it is not responsible for any amounts due from any other working interests or for the period after its subsidiary had sold its interest and terminated its status as operator of the field.

Settlement discussions have broken off, and the case is now proceeding to trial in state court of Cameron Parish.

Item 7. Financial Statements and Exhibits.

The Company files the following exhibit as part of this report:

Exhibit 99.1 Copy of the Company's press release, dated October 21, 1998, publicly announcing the quarterly earnings reported herein.

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

THE WILLIAMS COMPANIES, INC.

Date: October 21, 1998

ENERGY MARKET CONDITIONS AND UNFAVORABLE CHARGES REDUCE WILLIAMS' RESULTS

TULSA - With results reduced by energy market conditions and by pre-tax charges and write-downs of approximately \$70 million, or 10 cents per share, Williams reported unaudited net income of \$32.1 million, or 7 cents per share on a diluted basis, for the third quarter that ended Sept. 30.

This compares to unaudited restated net income of \$13.7 million, or 3 cents per share, for the same period of 1997, a quarter in which results were reduced by 17 cents per share for the cost of debt restructuring.

"It is never enjoyable to report a quarter that falls short of expectations," said Keith E. Bailey, chairman, president and chief executive officer. "But, we do so with a realization that we also achieved significant progress in a number of areas that will help position us to reach our longer term earnings performance goals."

Examples of that progress include:

- o Favorable decisions by federal regulators this summer to provide more competitive rates of return on equity for the gas pipeline industry, and an intent to examine other short- and long-term transportation issues in the relatively near future. The gas pipelines continue to exceed market growth objectives, and are on track to produce improved financial results for the year.
- o In energy services, a major California electric power marketing arrangement launched this summer already has proven very successful. While disrupted by hurricanes during the quarter, Williams completed the first phase of Mobile Bay, a suite of regulated and unregulated natural gas projects that provide a strategic platform for growth in the eastern Gulf of Mexico. In Texas and Louisiana, recently completed natural gas wells are expected to begin providing 25-35 million cubic feet per day of net incremental production in November.
- o With the continuing rapid completion of segments of its new national fiber optic communications network, Williams will attempt to complete the 32,000-mile system by the end of 2000, up to a year sooner than originally planned.

"While these and other examples of progress give us great confidence in our future, the reality is that we continue to achieve disappointing financial results in several key areas of our businesses," Bailey said.

2

He noted that gas liquids margins continue at historic lows. Refined product margins and prices have weakened as they have tracked this year's decline in crude oil prices. Low gasoline prices are translating into lower ethanol prices. And, continuing integration issues in the communications solutions business negatively impacted third quarter performance.

"We are concentrating our resources where we believe we can add the greatest short-term value without compromising long-term potential," Bailey said. "We will continue to examine all of our activities to ensure they reinforce the high growth potential that we believe exists for each of our principal businesses. Additionally, we will evaluate our capital spending on what we view as the highest priority investments."

For the first nine months of 1998, Williams reported net income of \$160.9 million, or 37 cents per share, compared with net income of \$310.8 million, or 72 cents per share, for the same period a year ago.

Following is a third quarter 1998 summary of Williams' major business groups:

GAS PIPELINE, the nation's largest transporter of natural gas through systems that span the United States, reported third quarter operating profit of \$141.7 million, identical to the operating profit reported during the same period of 1997.

The quarter benefited from expansions on the Transco system, new services offered on the Transco and Texas Gas systems and lower operating and maintenance expenses within the pipeline group. Quarter-to-quarter operating profit is flat because the third quarter of last year included favorable adjustments to certain accruals.

For the first nine months of 1998, Williams' gas pipeline business reported operating profit of \$489.7 million, compared with operating profit of \$453.9 million during the same period of 1997.

Other systems that comprise this group are Central, Northwest and Kern River.

ENERGY SERVICES, which provides a full spectrum of traditional and advanced energy products and services, reported third quarter operating profit of \$116.6 million, compared with operating profit of \$137.3 million in the third quarter of 1997.

The benefit of substantially higher electric power marketing and trading, lower operating losses from retail propane operations and increased petroleum pipeline transportation activities was more than offset by lower refining and per-unit natural gas liquids margins. Also, results from natural gas trading and ethanol activities were lower than during the same period a year ago. And, this quarter includes credit loss accruals of \$26.4 million for certain energy capital and retail energy activities, partially offset by the favorable settlement of a long-term transportation contract.

For the first nine months of 1998, Energy Services reported operating profit of \$315.7 million, which

includes \$45.9 million in MAPCO merger-related costs, compared with operating profit of \$413.2 million during the same period last year.

Units comprising Energy Services are: Energy Marketing & Trading, Exploration & Production, Midstream Gas & Liquids and Petroleum Services.

COMMUNICATIONS, which includes a leading-edge broadband network, single-source communications systems integration and multiple technology applications for businesses, reported a third quarter operating loss of \$25.6 million, compared with an operating loss of \$5.2 million in the same quarter of 1997.

Financial performance declined because of lower operating profit from communications solutions, including charges for asset write-downs, and the costs of building a network service delivery platform are being incurred in advance of the network being commercially available to customers.

Not included in communications' operating loss, but included in this third quarter investing income (loss) is a \$23 million write-down related to a network applications venture.

For the first nine months of 1998, Communications reported an operating loss of \$56.2 million compared with an operating loss of \$3.9 million during the same period of 1997.

ABOUT WILLIAMS (NYSE:WMB)

3

Williams, through its subsidiaries, provides a full range of traditional and leading-edge communications and energy services and is the nation's largest-volume transporter of natural gas. Williams information is available at www.twc.com.

(See Note 1 of Notes to Consolidated Statements of Income for additional information.)

See accompanying notes.

1. BASIS OF PRESENTATION

MAPCO ACQUISITION

On March 28, 1998, Williams completed the acquisition of MAPCO Inc. Williams acquired MAPCO by exchanging 1.665 shares of Williams common stock for each outstanding share of MAPCO common stock. In addition, outstanding MAPCO stock options were converted into Williams common stock. A total of 98.8 million shares of Williams common stock valued at \$3.1 billion, based on the closing market price of Williams common stock on March 27, 1998, were issued in the transaction. MAPCO is engaged in the NGL pipeline, petroleum refining and marketing and propane marketing businesses, and is included as part of the Energy Services' business unit.

The merger constitutes a tax-free reorganization and has been accounted for as a pooling of interests. Accordingly, all prior period consolidated financial information and statistics have been restated to include the combined results of operations, financial position and cash flows of MAPCO Inc. and Williams.

In connection with the merger, Williams has recognized approximately \$74 million in merger-related costs comprised primarily of outside professional fees and early retirement and severance costs. Approximately \$46 million of these merger-related costs are included in other (income) expense-net, as a component of Energy Services' operating profit (see Note 2), and approximately \$28 million is included in general corporate expenses.

OTHER

Effective April 1, 1998, certain marketing activities of natural gas liquids (previously reported in Midstream Gas & Liquids) and petroleum refining products (previously reported in Petroleum Services) were transferred to Energy Marketing & Trading and combined with its commodity risk trading operations. As a result, revenues and operating profit amounts for the three months and nine months ended September 30, 1997, have been restated to reflect this classification. These marketing activities are reported through first quarter 1998 on a "gross" basis in the Consolidated Statement of Income as revenues and profit-center costs within Energy Marketing & Trading. Concurrent with completing the combination of such activities with the commodity risk trading operations of Energy Marketing & Trading, the related contract rights and obligations of certain of these operations were recorded in the balance sheet on a market-value basis consistent with Energy Marketing & Trading & Trading's accounting policy, and the related income statement presentation relating to these operations was changed effective April 1, 1998, to reflect these revenues net of the related costs to purchase such items.

On April 30, 1997, Williams and Northern Telecom (Nortel) combined their customer-premise equipment sales and service operations into a limited liability company, Williams Communications Solutions, LLC (LLC) (see Note 4). Communications' revenues and operating profit amounts include the operating results of the LLC beginning May 1, 1997.

Operating profit of operating companies may vary by quarter. Based on current rate structures and/or historical maintenance schedules, Transcontinental Gas Pipe Line and Texas Gas Transmission experience lower operating profits in the second and third quarters as compared with the first and fourth quarters.

2. REVENUES AND OPERATING PROFIT

Revenues and operating profit of Gas Pipelines and Energy Services for the three and nine months ended September 30, 1998 and 1997, are as follows:

Three months ended September 30,

NOTES TO CONSOLIDATED STATEMENTS OF INCOME (continued) (Unaudited)

2. REVENUES AND OPERATING PROFIT (continued)

Included in the third quarter 1998 operating profit for Energy Marketing & Trading are credit loss accruals of \$26.4 million for certain energy capital and retail energy activities. Other (income) expense - net and operating profit for the same period includes write-downs of the carrying value of software for certain financial systems totaling \$8.9 million (\$5.6 million related to Communications) for consolidation of multiple financial systems.

Included in other (income) expenses - net and operating profit for Petroleum Services for the nine months ended September 30, 1998, is a loss provision for a recent order from the Federal Energy Regulatory Commission (FERC). On July 15, 1998, Williams Pipe Line Company received an Order from the FERC which affirmed an administrative law judge's 1996 initial decision regarding rate-making proceedings for the period September 15, 1990 through May 1, 1992. The FERC has ruled that the company did not meet its burden of establishing that its transportation rates in its 12 noncompetitive markets were just and reasonable for the period and has ordered refunds. The company continues to believe it should prevail upon appeal regarding collected rates for that period. However, due to this FERC decision, the company accrued \$15.5 million, including interest, in the second quarter of 1998, for potential refunds to customers for the issues described above.

3. INVESTING INCOME (LOSS)

Third-quarter 1998 investing loss includes a \$25.7 million write-down of the carrying value of certain investments. The largest of these is a \$23.2 million write-down related to a Communications network applications venture that was re-evaluated in the third quarter.

4. SALE OF INTEREST IN SUBSIDIARY

On April 30, 1997, Williams and Nortel combined their customer-premise equipment sales and service operations into a limited liability company, Williams Communications Solutions, LLC (LLC). In addition, Williams paid \$68 million to Nortel. Williams has accounted for its 70 percent interest in the operations that Nortel contributed to the LLC as a purchase business combination and beginning May 1, 1997, has included the results of operations of the acquired company in Williams' Consolidated Statement of Income.

Williams recorded the 30 percent reduction in its operations contributed to the LLC as a sale to the minority shareholders of the LLC. Williams recognized a gain of \$44.5 million based on the fair value of its operations contributed to the LLC. Income taxes were not provided on the gain because the transaction did not affect the difference between the financial and tax bases of identifiable assets and liabilities.

5. SALES OF ASSETS

In January 1997, Williams sold its interest in the natural gas liquids and condensate reserves in the West Panhandle field of Texas for \$66 million in cash. The sale resulted in a \$66 million pre-tax gain on the transaction, because the related reserves had no book value.

6. EXTRAORDINARY LOSS

The extraordinary loss in 1998 resulted from the early extinguishment of debt. Williams paid \$54.4 million to redeem higher interest rate debt for a \$4.8 million net loss (net of a \$2.6 million benefit of income taxes).

During third-quarter 1997, Williams initiated a restructuring of its debt portfolio. At September 30, 1997, Williams had paid approximately \$1.2 billion to redeem higher interest rate debt for a \$73.7 million net loss (net of a \$46.9 million benefit for income taxes).

Third Quarter 1998

OPERATING STATISTICS (continued)

	Three months ended September 30,			ths ended ber 30,
	1998	1997	1998	1997
Energy Services:				
Energy Marketing & Trading				
Physical Trading				
Natural gas (TBtuD)	3.2	3.1	3.4	2.9
Power (GWh/hour)	8.5	2.1	5.4	1.1
Propane Marketing				
Retail (million gallons)	39.3	45.0	183.0	187.4
Exploration & Production				
Natural gas production (TBtu)	9.0	9.6*	29.1	27.5*
Midstream Gas & Liquids				
Field Services				
Gathering volumes (TBtu)	509.3	559.7	1,571.6	1,618.2
Processing volumes (TBtu)	131.1	131.9	399.4	383.4
Natural gas liquids sales (million gallons)	149.9	161.4	435.4	424.9
Natural Gas Liquids Pipeline				
Barrel miles - total system (billions)	33.8	36.0*	102.4	107.1*
Mid-America Pipeline deliveries (million barrels)	66.8	69.4	203.5	205.8
Seminole Pipeline deliveries (million barrels)	24.6	27.7	71.7	79.2
Rocky Mountain Extension deliveries (million barrels)	7.5	9.1	22.1	26.6
Petroleum Services				
Petroleum Products Pipeline				
Shipments (million barrels)	57.1	59.7	167.1	173.2
Barrel miles (billions)	16.0	16.0	44.7	44.8
Ethanol sales (million gallons)	45.0	38.3	129.5	101.8
Refining (crude runs)				
Memphis (MBPD)	119.1	116.1	120.5	108.5
North Pole (MBPD)	128.5	132.2	130.7	131.1
Retail stations				
Average monthly gallons per store (thousands)	178.3	141.9	165.5	148.3
Average number of stores	254	251	253	241
